

Proactive services

The Catalan Government work in progress

15th november 2022

Our approach to digital government

Proactive, personalized services

deliver to every person the service she needs when she needs it

proactive

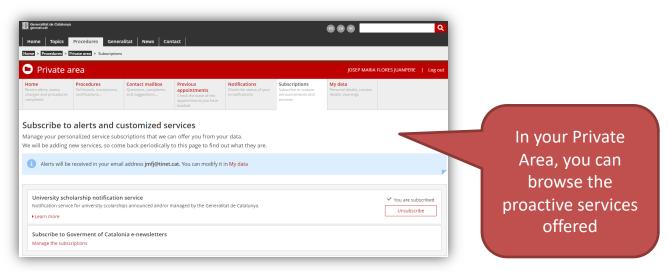

personalized

What do we know on user needs?

Bias: no data on paper-based requests, Corporate application form platform local procedures and some sectorial • 2016-2019 digital applications procedures Big Data study Big data Because of the bias, some existing correlations couldn't become visible • Most people asking for procedure A will also ask for procedure B • Most people asking for procedure C will repeat However, some use cases were found Hypotheses • Application alerts: grants, public job offers 2021: university grants Pre-filled forms • Personalized alerts: license renewals Possible proactive Procedure recommender services 2023: card renewals 2022: not good data enough to build Generalitat de Catalunya **Departament de la Presidència** high-quality recommendations

Consent management

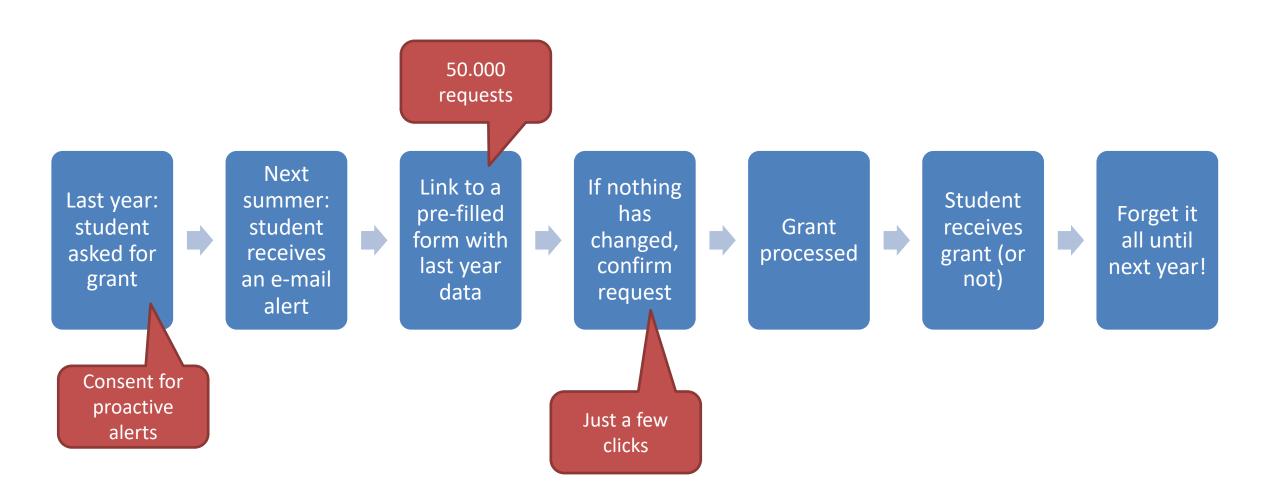

Protecció de dades: Pot consultar la informació detallada sobre la protecció de dades

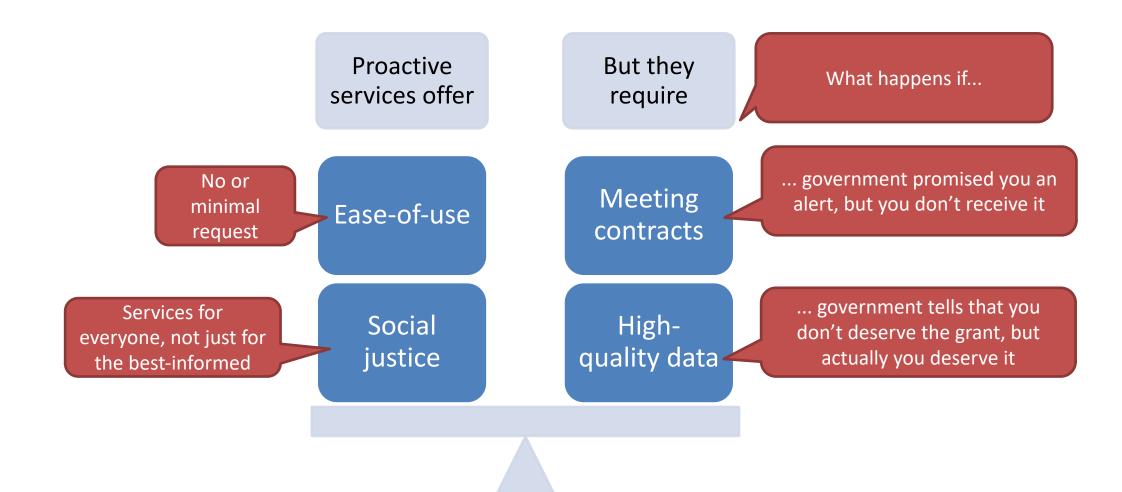

Consent
management can be
done by the user,
with no public
employee effort

A success in progress: university grants

Ethical balances

Conclusions

Proactivity is a work-in-progress

New data creates new opportunities

New approaches: life events

Balance proactivity / responsibility
